TITLE : TRANSFERRING AND FIXING DEVICE

ABSTRACT : PURPOSE: To prevent the meandering of an intermediate transfer body by providing members for controlling the transverse movement of the intermediate transfer body to a roller-shaped member provided to come into contact with the intermediate transfer body from a heat roller to an image holding body for the purpose of cooling the intermediate transfer body.

CONSTITUTION: The roller-shaped member 19 having a cooling member for cooling the intermediate transfer body 14 has the control members 20, 20 for controlling the transverse movement of the intermediate transfer body 14. Since the members 20 to control the transverse movement of the intermediate transfer body 14 are provided to the roller-shaped member 19 in such a manner, the meandering of the intermediate transfer body 14 is prevented and the deterioration in the performance of the image holding body 1 and the generation of toner filming are obviated.
